Outrageous Violence

By Hujjattullah Zia

Lack of tolerance seems to be one of the challenging issues in our society. Intolerance is a major reason behind the rise of terrorism and inhuman activities. It has adverse effects on our personal views, family relations, and socialization. It starts with a conflict of thoughts and words of others, they will resort to violence. Before we see someone’s thoughts and words, we will always try to understand them. We will always try to understand their communication and try to identify the hidden message. It is due to not practicing Islamic tenets properly. Just because of this, we have to work more on religious and educational lifetime. Not only the syntax but also the semantics and the logic of the article were highly complicated.

In our society, the problem of the people is that they do not understand their rights and responsibilities and the ones who are responsible for educating the people and teaching them to do the right things. Most of the families do not have enough facilities, education and responsibilities should be inculcated within the individuals by the parents. The citizens are required to respect the rights of others. It is the responsibility of the citizens to teach these concepts in their families and then in society. The citizens are required to respect the rights of others and also to work for the society. The citizens are required to teach the kids to do the right things and to have harmony in the society. The citizens are required to respect the rights of their children, the children in return would be responsible beings. They would then protect the rights of others.

The right of the people to a secure and peaceful environment is a basic human right. The people have the right to live in a free and dignified environment.

The government and all those who support this criminal act must raise their voice through a strong and widespread reaction against this. The government should task the Interior and Security ministers to work together for stopping terrorism.

The rights and dignity of mankind is held in high value in the Universal Declaration of Human Rights. The rights and dignity of mankind are the same whether they are rich or poor, whether they are men or women, whether they are Indians or Pakistanis. The rights of mankind are the same and they cannot be divided.

Encourage the people exhausted from the war waged by ISIS. The people are entitled to indescribable violence, what do you expect of simple people who denied them the chance of living or it was impossible for them to live in Afghanistan. The question is that was it Afghan traitors? Millions of dollars were spent generously under the pretext of building the economic infrastructure, how many members of terrorist networks and their fundamental ideology, their economic and social support, how many leaders, in Afghanistan?
