Uncultivated Poppy Control

It is a social-crisis organization, disclosed on Sunday, August 13, 2007 that poppy has been cultivated on more than 20,000 acres of land in the province. The organization also claimed that more than 350 tons of crop has been collected. This is most alarming and unfortunate fact as it is bound to benefit the terrorist networks in the country. As a matter of fact, poppy cultivation and narcotics have been Afghanis' top concern as it draws money from the country the nation has to pay for the drug war. 

In the last two years, we have taken important steps towards regional convergence through designing and implementing regional projects. We want to see the Afghan poppy cultivation reduced to a considerable extent. Our country is well-knit in the larger network of organized crime. But unfortunately, the measures that have been carried out to counter the growth of this menace have not been comprehensive and serious. It is even being believed that the important figures are involved in backing this business. And the growing insurgency. Definitely, the poppy business in Afghanistan has a direct link with insecurity and terrorism; therefore, there are possibilities that crop yield under discussion will most likely fuel insecurity and terrorism in the times to come.

As Khat believes, poppy cultivation has a direct link with insecurity and terrorism. And the growing insurgency.
