Out of the Frying Pan into the Fire

I n retrospect, the conflagration and massacre of the dark days of war by Talibani regime will never fade into oblivion. Afghan people recur with fear and hatred whenever they see the same atrocious actions of the militants’ callous actions flash through their minds. Wounds still wince at the memory of how horribly their husbands were beheaded and the tearful eyes of orphaned orphans bespeak of the regime’s heinous crimes. Likewise, the painful wounds of mothers bleeding for missing their dear ones and the anger of revenge is boiling up inside the victims’ par- ties. That is the reason why the picture of the inside and the dark and tragic death of innocent people is too difficult to put into words.

In spite of amnesty declared many times by government for Taliban’s prisoners, the plight of instability and suicide attacks by Talibani-led insurgents does not only remain unabated but also rapidly increasing in intensity. It is believed that the Talibani prisoners release is not a panacea for the current instabilit-
y of which the regime is operating on the ground.

According to common knowledge, maximum of Afghan citizen- s who have been involved in this war or war related issues, the war has certainly hurt all of us, and the will of former President were not only foisted upon the regime that has a rather clear stance. It is a matter of concern when the great and continuous kind- nesses of the Taliban are being mentioned. It has also been ex- perienced that there might be many groups under the regime. People who are not supporting the regime but have the will and the courage to give their lives for the sake of the state which are not recognized as “Nuclear Weapon States” by the Nuclear Non-proliferation Treaty (NPT).

This is basically discriminatory as the countries are divided into three categories: “Nuclear Weapon States” or “Non-Weapon States. The countries that acquired the nuclear weapon over the years are not recognized as “Nuclear Weapon States” and are above any sort of sanctions, while the other countries Nuclear Non-proliferation Treaty (NPT) countries will have to go through scrutiny by their states. The basic question at this instant is: “Why are the other countries not considered as the threats of the nuclear power of the “Nuclear Weapon States”?” There can be a comprehensive discussion on the matter and there can be different answers but the only one that stands true is that the nuclear weapon in possession of any country can be a threat.

The efforts to control the proliferation of nuclear weapons worldwide and for all the WMD were already in the form of efforts. A non-proliferation effort for the cancellation of nuclear weapons by the US for the use of peaceful purposes was started. The US has been in the forefront of nuclear weapons and their efforts to explain them. The research for the development of nuclear weapons basi- cally started in World War II when the then powerful nations of the world were divided into two camps each with the will to stabilize the other. The countries like the United States, United Kingdom, Ger- many, Japan and the Union of Soviet Socialist Republic all were in competition with each other to design a weapon to destroy people upon their use. This has already been proved by the nuclear weapon used in Hiroshima and Nagasaki in 1945. Though there have been considerable efforts since the inci- dent regarding the non-proliferation movement, the world still is threatened by the uncontrollable spread of nuclear weaponry and energy.
