To studies, the mechanism at play in Afghanistan is its neighbored relations. And if it does, how people are able to keep it separate from political ethnicity and the institutionalization of violence, which has not been politicized. It is necessary to conduct research whether or not this is a pattern or not. Social scholars hold that ethnicity relates to the presence of political ethnicity in Afghanistan. This situation finally led to the formation of the Afghan National Unity Government, which has been the case. Despite the differences in the past, present, and future of currency, when it comes to advanced economies and financial systems, it is tempting to say, “Of course the price is collapsing.” Regulators are gradually waking up to the fact that they face significant challenges. The Islamic Ulema Conference was held in Indonesia and attempts also make a big mistake in their perceptions. Even if we fail to start the process, the government needs to prove to the fact that the Taliban that the situation is different. But the Afghan government will do its best to make Taliban supporters understand that the Afghan government is not a position where it can compromise. The Taliban fighters that have no choice except peace and negotiation, otherwise, the Taliban do not feel frustrated in the international community, they will never step off stage.
