What is the Key Factor to Economic Development?

By Muhammad Zahir Akbari

According to World Bank estimates, the economic output for the country has been increasing since 1995. The World Bank estimates that Afghanistan's growth rate is in the range of 5% to 6% in 2016 and 7% in 2017. However, comparing this growth rate with the past decade, it is clear that our economic growth rate has stagnated. In 2010, the World Bank estimates that Afghanistan's growth rate was 3.5%. This means that the growth rate has increased by 1.5% to 2% in the past decade.

In terms of economic growth, Afghanistan has been the highest in the region and the growth rate has been quite high. The growth rate has been quite high in the past decade. However, comparing this growth rate with the past decade, it is clear that our economic growth rate has stagnated. In 2010, the World Bank estimates that Afghanistan's growth rate was 3.5%. This means that the growth rate has increased by 1.5% to 2% in the past decade.

So, our economic policy should be oriented towards developing human capital, which is the key factor to economic development. By focusing on developing human capital, we can ensure that our economic growth rate increases. However, focusing on developing human capital requires investment in education, which is the key factor to economic development.

The deficiencies in legislation have to be removed. The Unmitigated Violation of Human Rights

In the Name of God, the Most Merciful, the Most Kind

As a nation, we have to ensure that our economic policy is oriented towards developing human capital. By focusing on developing human capital, we can ensure that our economic growth rate increases. However, focusing on developing human capital requires investment in education, which is the key factor to economic development.
