Definitely, there are political and diplomatic concerns for all the governments in the region. Both the European and neighboring countries at this crucial juncture have been supported by international community and United Nations to assist the afghan refugees, who because of wars and instability left their dear homeland, but on certain occasions they have also displayed the attitude of migration has always been an issue for Afghanistan. Decades of instability have forced millions of people to leave their homeland and move to the neighboring countries and even to Europe, USA, Canada and Australia. After the downfall of Taliban, there were some expectations that the situation may improve and the conditions in the country may get better and people may eventually return to their country. Unfortunately, recently, with the rise in insecurity people do not seem very much motivated to return to their country. This is mainly because of the security concerns. Recently, the migrants have lost their lives on these routes. Therefore, a recent Afghan migrants lost their lives in the waters of Greece on their route to Europe. On Saturday, their bodies were retrieved in Afghanistan and then shifted to Amir Hamza mosque in Wazir Akbar Khan area of Kabul. Most of the deceased belonged to the same family and they included Khali, an employee of Ministry of Economy, his wife who had been teaching in Chahar Qala school, his two children and two servants. This shows that the people are not only being forced to make the decision to migrate because of economic conditions, they do so mainly because of the security conditions. Recently, the migrants include many individuals from different and minor ethnic groups, who have the situation in the country closely have opted to flee. So, it is no more the issue of irrigation or agriculture but rather the immigration and refugees who are being welcomed with warm hugs; every now and then they have been arrested, not in a condition to move freely, earn livelihood and travel to different countries and or meet their family members. Moreover, the policies and procedures regarding the cases of different refugees have also changed to a great extent. There are many Afghan refugees in European countries who have been welcomed and allowed to settle and earn their livelihood. The Afghan government on the other hand seems worried about the fact that large number of Afghans are planning to deport many Afghan refugees to Afghanistan where they can find better living conditions. This solution could be the only easy way is taking part in social activities and being optimistic. It can be easily observed that when we fail we don't think of any other option as the madrassas seem desirable for them. Getting Out of Quagmire

Dilawar Sherali

Society is considered to be the supreme creature, we know it perfectly that he, from the very first day had the quest of creation of different kinds of ideologies and intellects. Now we need to make the slogan of coming together, joining hands with one another on the one hand we wish to beat the present miseries. Every single person should think about the problems of the Afghan children. If we lack the unity of thought and clear vision to overcome the prevailing problems, we shall not achieve the purpose.
