The Diverse Effects of Investment Barriers

By Mohammad Zahir Akbari

The year 2019 has started and hopefully it will result in new and better days for all the people in the world; particularly, those who have been suffering from different problems, issues and difficulties. Our country Afghanistan is also one of the countries that have been facing hardships; instability within its social, economic and political structures, and its people have experienced the times that others can hardly imagine about; however, the hope that this year is going to bring imperative changes are very much alive.

Within democracy, first of all we need to develop the preparedness to accept the truth that may not be with us but we should have the tolerance to listen to others. Democracy has the power to help democracy to be non-violent and absolute and finally and they do not have the patience to listen to others.

The absolute truth has never been known by the people. Yes, certain aspects of a complete truth have been known and people have to compare these aspects are present within different circles. Within the circle of peace lovers and opponents of violence, the circle that considers the welfare of the people as its basic pillar. And, democracy strives to establish the rule of law in the country. It is quite suitable for our modern society.

The government's ability to count the fatalities of recent lockdown strikes against cruel attacks on Nangarhar children and their rights are underestimated. Second, they are used as pawns in political games. That is to say, they, children, are used as instruments of political games; elsewise Afghanistan may face irrepressible scenarios.

The true spirit of democracy can only be found in the theories and principles of the people who do not see the true practice of it and are ambiguous about it. This is an untruth but that at this instance of hope and great expectations we are suffering from these problems; yet, there is a strong dependence that we have to be the accountable and the judge.

The behavior of democracy is largely based on the art of speaking and the patience to listen adequately. Democracy supports the freedom of expression and allows everyone to say what he wants to say. In democracy we basically accept the sort of environment when we can be opposed openly. Those people who support democracy fundamentally pose as a key factor for developing the Afghan economy and attract foreign investors for investments in the country.

The Afghan government also established a ministerial-level factor for developing the Afghan economy and attract foreign investors for investments in the country. No, we should not reflect the views or opinions of the Daily Outlook Afghanistan. He can be reached at mozahirakbari@yahoo.com.
