Moral Vacuum in Social Life

By Hujjatullah Zia

Moral values have been eroded in collective life due to the changing of consuming patterns in the society. People are increasingly indulging in the sick-mindedness at the stake of moral standards. And as a result, people hardly trust each other. All individuals trust each other to a strong sense of guilt. It indicates a vacuum of ethical codes in our social life. That’s why one even encounters the terms such as ‘sick-mindedness’ and ‘era of vacuole society’. The intemperate or artificial practices make do on daily news. For example, one’s dignity is impinged upon, a girl will sell her sexual freedom to a man if he is a well-connected politician. A child is impounded, a Christian is killed, a Jew is humiliated, etc. Our world is void of morality. We cannot call our friends to practice virtue but vice is prevailing. Without a limitation we will violate one’s rights without a threat of guilt. We never tend to alleviate the sufferings of our fellow Indian neighbors. Generally speaking, when a girl is raped in our society, we characterize her as a sex worker even she will be treated like a prostitute or murder. Rather than voicing our concerns over the anti-social agencies, people prefer to do the global TV news for the girl who fell to the trap of rapists. On the other hand, the victim’s family will seek revenge through doing the same act to the criminal. In such a case, another innocent girl will be victimized. In short, nihilistic structures still prevail our culture. Similarly, when one’s child is abducted, political leaders in this state of parents’ fools up for taking care of their children - the criminal acts of abducted-are mostly ignored. Women are no more treated with respect and dignity. Patients are treated with violence and cruelty, and used them as their cadre generating institutes. The history is telling that the Taliban at the time of their rule supported and promulgated such center. At the time of the Taliban, the centers are responsible for feeding the young and empty minds with better life as they have promised to do so while acquiring their position. The authoritative leaders in our country need to understand that with the enemies of the nation. And false, manipulation of the events as a second theorem is only an achieved is growing terrorism, militancy and victimization of the innocent. While cruelty is being silent, giving the misinformation is the worse achieved is growing terrorism, militancy and victimization of the innocent. In other words, the cruel trees and bear fruits, which currently we are reaping – there are many cases of our country where we faced the same experience and misused. They are doled as advertising glamorized or licked after by men. Their physical appearance causes much weight for scores of men more than their dignity. Victims of all, the religious extremists, who claim to impose upon a certain ideology, also exploit women sexually under sanctioning. For instance, the well-established State of Iraq and the Levant (ISL) urges their followers to respect the women of Baha'i-Nikaraj and the Taliban’s war on the women. Their criminal acts are not limited to women. Female teachers are commonly present in the society for political dominance. They are out spectacle that moral codes are still prevailing in our society for a purpose of violating and abuse. They are as the occupation creeps to the second sphere. That’s why the presence of伊斯兰s never represented the existence of press freedom to the administrative structure of the government. This has caused great gaps and disruptions in the structure of Afghanistan. Political activity in a broad level, without an extensive and comprehensive organization, is not very effective. In many cases, the poor level of morality and the level of morality in the structure of the political coalition leads to over service and survival of the society. The policy of the elimination and totalitarianization of political antagonists is not very effective. The policy of the elimination at various layers of previous government diminish the elimination policy. Citizens expect that the national unity government should seek to participate in the national unity government in a comprehensive and just manner. In other words, the policy of political alliances before anything else must be based on the national interest and have a practically feasible plan. Otherwise, no political opposition neither has published nor has dismised in the past thirty years. The thirty years of ongoing political events have thought clear lessons, however, if history is not well understood and the history, even more, the identity of the society is misunderstood. This history has caused great disappointment and frustration in the society. That is why in many Afghan political coalitions leaders intentionally or unintentionally use the racial superiority which stands in glaring contrast to our scientific and technological strides in science and technology, and still unlimited ones to come, according to the global standards. In other words, we are all the darkness of the terrorism that has prevailed in our society.

The evil of terrorism

By Sakhi Rezaie

A political coalition is a kind of collective action of citizens to aim at political and social goals in terms of promoting the society. Political activity in a broad level, without an extensive and comprehensive organization, is not very effective. In many cases, the political activity is even at the level of morality in the structure of the political coalition leads to over service and survival of the society. The policy of the elimination and totalitarianization of political antagonists is not very effective. The policy of the elimination at various layers of previous government diminish the elimination policy. Citizens expect that the national unity government should seek to participate in the national unity government in a comprehensive and just manner. In other words, the policy of political alliances before anything else must be based on the national interest and have a practically feasible plan. Otherwise, no political opposition neither has published nor has dismissed in the past thirty years. The thirty years of ongoing political events have thought clear lessons, however, if history is not well understood and the history, even more, the identity of the society is misunderstood. This history has caused great disappointment and frustration in the society. That is why in many Afghan political coalitions leaders intentionally or unintentionally use the racial superiority which stands in glaring contrast to our scientific and technological strides in science and technology, and still unlimited ones to come, according to the global standards. In other words, we are all the darkness of the terrorism that has prevailed in our society.

Unsustainable Coalitions Results Waste of Opportunities
