RNAUSSIA LAUNCHES NEW TELESCOPE INTO SPACE AFTER DELAYS

Russia launched a major new telescope into space on Thursday, overcoming challenges that had delayed the project for years. The Russian space agency Roscosmos said the telescope, named Spektr-RG, was delivered into space on a Soyuz rocket.

The telescope is designed to study the universe’s deepest mysteries, from the origins of the cosmos to the nature of dark matter and dark energy. It is expected to provide new insights into the workings of the universe and help scientists better understand the nature of the cosmos.

Roscosmos said that the $2.2 billion worth of advanced equipment for Taiwan said on Monday, defying the United States.

On Tuesday, the United States announced plans to sell at least $735 million worth of arms to Taiwan, including F-16V fighter aircraft and advanced missiles, in a move that is likely to further escalate tensions in the Taiwan Strait.

**China Says Will Freeze U.S. Companies That Sell Arms to Taiwan**

CHINA LAUNCHES NEW TELESCOPE INTO SPACE AFTER DELAYS

Beijing: China has called on U.S. companies to stop selling arms to Taiwan, warning that they will face sanctions if they continue to do so.

In a statement released on Monday, the Chinese foreign ministry said it was “vigorously protesting” and “taking firm and necessary countermeasures” against the United States for selling arms to Taiwan.

The statement said China reserves the right to take further countermeasures if the United States continues to sell arms to Taiwan.

China has expressed its strong opposition to any attempts by the United States to sell arms to Taiwan and has多次强调中国坚决反对任何外部势力干涉台湾内部事务.

**Turkish Marks 3rd Anniversary of Failed Coup**

TURKEY MARKS 3RD ANNIVERSARY OF FAILED COUP

Turkey marked the third anniversary of the failed coup attempt on July 15, 2016, with widespread commemorations across the country. President Recep Tayyip Erdogan, who was on a trip to Africa at the time of the coup, spoke in front of thousands of people in Istanbul.

Erdogan vowed to continue his fight against what he called the “terrorist group” of Fethullah Gulen, whom he accuses of orchestrating the coup.

Erdogan also said Turkey was “in a process of transformation” and that the country was on the road to recovery.

The coup attempt on July 15, 2016, was a major setback for Erdogan’s government, which has sought to consolidate its power in the face of opposition from the military and other bodies.

**Iran May Return to Pre-JCPOA Conditions**

IRAN MAY RETURN TO PRE-JCPOA CONDITIONS

TEHRAN: Iran may return to pre-JCPOA conditions on the Nuclear Energy Agency in Vienna that monitors Iran’s nuclear program. The changes in the nuclear deal have raised concerns among some observers that Iran may be seeking to get back to the status quo before the agreement was signed.

The agreement, known as the Joint Comprehensive Plan of Action (JCPOA), was signed in 2015 by Iran and six world powers, including the U.S., the U.K., France, Russia, China, and Germany. The deal aims to prevent Iran from developing a nuclear bomb.

**Qatar Launches New Telescope into Space after Delays**

QATARI TELESCOPE LAUNCHES INTO SPACE

Qatar has launched the new Spektr-RG telescope into space, fulfilling a major milestone in its space program.

The telescope, which is one of the most advanced in the world, will help Qatar detect the universe’s deepest mysteries, from the origins of the cosmos to the nature of dark matter and dark energy. It is expected to provide new insights into the workings of the universe and help Qatar better understand the nature of the cosmos.

Qatar has invested heavily in its space program in recent years, with the aim of becoming a regional leader in the field. The launch of the new telescope is a significant step towards achieving that goal.

**President Urges Using Applied Physics to Meet Needs of Energy, Health Sectors**

WILL USE APPLIED PHYSICS TO MEET NEEDS OF ENERGY, HEALTH SECTORS

President Xi Jinping has called for the use of applied physics to meet the needs of the energy and health sectors, during a meeting at the annual session of the 13th National People’s Congress.

The president said China should be a leader in the application of physics to address the pressing needs of the country, particularly in the areas of energy and health. He also called for the development of new technologies and applications in these fields.

**Western Hawk Steal Show at Iran-Bashing Mko Event**

The NCRI is a US-based group that has been designated a terrorist organization by Iran, and the council has been actively seeking to overthrow the Iranian government for years.

**EPA Orders Program to Eradicate Poverty, Economic Growth**

THE EPA ORDERS PROGRAM TO ERADICATE POVERTY, ECONOMIC GROWTH

The Environmental Protection Agency (EPA) has ordered a program to eradicate poverty, economic growth, and social inequality.

The order, issued by EPA Administrator Andrew Wheeler, follows the release of a report by the agency that found that poverty and economic inequality have increased in recent years.

The EPA’s report found that poverty affects people of all ages and races, but is particularly prevalent among low-income families, people of color, and those living in rural areas.

The agency also found that economic inequality has increased in recent years, with the top 1% of the population earning a disproportionate share of the nation’s income.

The EPA’s program is designed to address these issues by implementing policies to reduce poverty and economic inequality, and to promote economic growth and social mobility.

The program includes initiatives to increase access to affordable housing, improve access to healthcare, and support the development of infrastructure projects in underserved communities.

The agency also found that economic inequality has increased in recent years, with the top 1% of the population earning a disproportionate share of the nation’s income.

The EPA’s program is designed to address these issues by implementing policies to reduce poverty and economic inequality, and to promote economic growth and social mobility.

The program includes initiatives to increase access to affordable housing, improve access to healthcare, and support the development of infrastructure projects in underserved communities.

The EPA’s order calls for the creation of a task force to oversee the implementation of the program, and for the agency to develop a comprehensive plan to address poverty and economic inequality.

The task force will be comprised of representatives from federal, state, and local governments, as well as from non-profit organizations and community groups.

The task force will be responsible for identifying the most effective strategies for addressing poverty and economic inequality, and for developing and implementing policies to reduce these issues.

The EPA’s program is supported by a coalition of organizations and individuals who have been advocating for policies to reduce poverty and economic inequality for years.

The coalition includes a range of groups, from think tanks and advocacy organizations to labor unions and community groups.

The coalition has been working to raise awareness about the challenges of poverty and economic inequality, and to promote policies that address these issues.

The EPA’s order is a significant step forward in the effort to address poverty and economic inequality, and to promote economic growth and social mobility.

The agency’s work is important, not only because of the scale of the problem, but also because of the ripple effects that poverty and economic inequality have on communities across the country.

The EPA’s program is designed to address these issues by implementing policies to reduce poverty and economic inequality, and to promote economic growth and social mobility.

The program includes initiatives to increase access to affordable housing, improve access to healthcare, and support the development of infrastructure projects in underserved communities.
