**Plan to Classify Electoral Districts Finalized: Faisal**

The Chief Executive Officer (CEO) on Thursday said the plan to classify electoral constituencies in districts was being referred to the Independent Election Commission (IEC) within the upcoming seven years. Statistics by the Afghan Air Force reveal that there are four Mi-35 Russian strike aircrafts and 26 Mi-17 lift aircrafts in Afghanistan. Two of the Mi-35 Russian helicopters need repairing. The statistics reveal that Afghanistan has 120 aircrafts in total including 56 strike planes, 60 lift planes and 71 helicopters. The number, official said, will be increased to 260 in total including 175 strike planes, 89 lift planes and 214 helicopters. Researchers have decided to send its troops to Ukraine in 2015, the U.S. and the European Union agreed on sanctions against Moscow. Since then, the repairing of Russian helicopters has become complex issue for Afghanistan. Ahead of the sanctions, the Russian helicopters were sent to Ukraine and Czech Republic for repairing. "The intention is not to..." (Mom on PA-10)

**Serious Concerns Raised Over Rising Casualty Toll among Soldiers**

KABUL - More than 200 soldiers have been killed in coordinated attacks by the Taliban against military installations in Kandahar in the past month. A number of military experts on Thursday criticized security agencies and accused them of being weak leaders and lacking intelligence capacities on the back of the steadily rising death toll among security forces - particularly in Kandahar. More than 100 soldiers have been killed in Taliban attacks on security installations in Kandahar alone in the last month, in addition, at least 40 soldiers were wounded in the attacks. Military experts said the lack of intelligence-gathering abilities has led to insurgents being able to carry out attacks on military bases. "We will be able to foil these attacks also other attacks and tackles of the enemy if we have a strong intelligence..." (Mom on PA-27)
