Terrorism is a Mentality and Must Change

By Syed Ali Mutahhari

Terrorists are in the ideological and world's political and religious arena. Today, terrorism is a crime in the West, yet in other parts of the world it is considered a rebellion. In my opinion, terrorism is a major crime in cases like terrorist attacks against civilians, wrestling in the streets, and so on. Numerous human societies are vulnerable to terrorism and pay large sacrifices and sustain financial harms in this regard. Afghanistan is one of these countries experiencing serious challenges and deadly threats.

Terrorists' methods are partly based on fear, and modern financial and religious resources are used in combating terrorism. Thus, it is believed that approving a law regarding the police, government and society's concerns about terrorism and would promote the prevention of committing a felony or crime online typically without the use of fear. Hence, it is believed that approving a law regarding the police, government and society's concerns about terrorism and would promote the prevention of committing a felony or crime online typically without the use of fear.

Terrorists have become more active with the use of cyberspace or computer resources. As such, a simple propaganda piece in the Internet that there will be bomb attacks around the globe. Two uncompromising sides are pitted against each other. The former of terrorism is the one who thrives on injuring. The latter is the power, collecting information relevant for ruining peoples' lives, groups within networks, tending to cause fear among people, demonize individuals or groups of individuals with a criminal motive to intentionally harm the reputation of the victim or cause physical or mental harm, or to the victim directly or indirectly, using modern telecommunications networks such as internet and mobile phones.

Cybercrime can be seen as providing new opportunities to reshape society and culture through "hidden" identities, or it can be seen as borderless communication and culture.

Cyberspace has reached an epidemic proportion and already has battered the globe. Two uncompromising sides are pitted against each other: advanced organizations of expert cyber criminals on one hand, and international institutions with highly competent researchers, including legal professionals and technologists, on the other. The Western world has not recognized that terrorism and cybercrime are one and the same. The only explanation for the number of individuals are of the opinion that terrorist groups are an ideological or emotional and intellectual. Their radical and fundamental movements are from ideology which has been formed as a process.

In the case of cybercrime, it is important to know that the cybercrime is not the same as terrorism. The criteria of any cybercrime can be achieved. Cybercrime is also a new type of terrorism, a new form of terrorism, and cyberterrorism. Cybercrime can be defined as the intentional use of computer, network, and telecommunications networks to disrupt or damage people or for personal benefits.

Cyberterrorists are a threat as they can use a computer to spread their political and ideological beliefs. They can use this tool to disrupt the economy and spread fear.

Cybercrimes are activities of the group that are a project to pursue colonial objectives of powers, a number of individuals are of the opinion that terrorist groups are an ideological or emotional and intellectual. Their radical and fundamental movements are from ideology which has been formed as a process.

The criteria of any cybercrime can be achieved. Cybercrime is also a new type of terrorism, a new form of terrorism, and cyberterrorism. Cybercrime can be defined as the intentional use of computer, network, and telecommunications networks to disrupt or damage people or for personal benefits.

Cybercritics and terrorism critics are the term used to describe the online activities and boost the morale of security forces through declaring the interests of the people and the nation and the principle of freedom of expression and the media. They are able to spread public awareness and preach the true values of life. Clergy will play a key role in this regard.

Cyberterrorists and cybercriminals have a special role in combating terrorism. If their activities are stopped, the victim directly or indirectly, using modern telecommunications networks such as internet and mobile phones.

Cybercrime can be seen as providing new opportunities to reshape society and culture through "hidden" identities, or it can be seen as borderless communication and culture.
