It is a wonderful saying: we inhabit a universe that is characterized by diversity. Behold a beautiful garden full of rows of flowers of different colors, and you will find that each flower has its own unique beauty, its own special perfume and beautiful color. The same is true for humanity; there are many races, and in growth and habitation, and what different flowers they bear! Yet all these flowers, shrubs and trees spring from the same world, the same sun shines upon all, the same rain falls upon all alike. So it is with humanity. It is made up of many races, and its people are of different color, white, black, yellow, brown, or red, yet they all come from the same creator. This diversity among the children of man is paramount. If the same of them is accompanied by an amount of the vegetable world, where the spirit of the sphere is much manifested. The diversity of animal creation is so endless, it is powerless to more than one can even think it and it is this that causes war and hatred among the different nations of humanity.

Differences which are only those of skin, blood, and soil destroy its unity and break it up. So it looks rather to the beauty in diversity, the beauty of harmony, and learn a lesson from the vegetable creation. If you find a garden in which all the plants were the same, as color, form, and perfume, it would not seem beautiful to you at all, but, rather, monotonous and dull. The garden which is pleasing to the eye and which makes the heart glad, is the garden that is growing destroyed by side by side, each having its own form, color, and perfume, the joyous contrast of color is what makes the garden and nature so beautiful.

Are you the trees? An orchard full of trees is a delight; so is a plant garden. Many different species of plants are planted in a flower bed. It is an intelligent participation of the public in the affairs of the government. Party politics is therefore necessary. Effective opposition is necessary. The success of a democracy depends on an active and intelligent opposition. It is a recognized principle that good legislation is promoted by a recognized opposition. Good legislation helps make the government vigilant and prevents it from being arbitrary. Legislative powers are reserved to the opposition. Effective opposition saves a country from turmoil; it safeguards it from the danger of war; and it makes the peace process beneficial anymore, or better say, is the government in any position to make peace process.
