The Political Games

To Afghanistan, politics has turned into a nauseating profession. People do not consider it honorable and do not have a positive notion about the politicians and their activities. Though politicians bear one of the most important responsibilities of taking care of the affairs of the state and, therefore, should have an honorable position in the society; they are thought to be treacherous and difficult to believe. Recently, the activities of the present government in particular and politicians in general have made the people lose their confidence on politics. They have started believing that the current political system will not heal their wounds and address their issues. This has also resulted in depreciation of legitimacy of the government and the political leaders, which is something very alarming and may lead to chaos and anarchy in the times to come. And, Afghanistan that needs to solve most of its issues through peaceful means, cannot afford to face such a scenario.

Of the basic reasons that politicians have been criticized is the performance and the attitude of the politicians. Like all the other fields of life, it is also important to say that the politicians must have basic understanding of politics or even should have the formal education of democracy. Unfortunately, that is not the case – today those people become politicians who have financial support, enjoy good reputation in the society, belong to the elite or authoritative strata of the society or are the landlords or belong to different sorts of mafia. They join politics to maintain their status in the society or to gain power so as to achieve their personal goals. They, in fact, have no consideration for human welfare and betterment.

Though they are dependent on people for favor, they do not know how to respond to the people. They do not understand their basic problems and do not have any sort of familiarity with the dynamics of politics and political changes. With such a scenario at hand, it is very much possible that politics is further humiliated and degraded in our society.

It can be said without a doubt of politicians that have not been very much skilled in their jobs and they have made politics a filthy job. Though we have myriads of problems, the politicians in stead of solving those problems try to pursue their own gains. The society is far from getting the justice they deserve.

There are various troubles we are experiencing. We are facing different economic and political challenges and the fact is that we are not prepared at all to overcome them. Years of wars and instability have further decreased our abilities to overcome these challenges. Along with those problems, there is corruption, which has completely dominated our administrative system. Extremism and terrorism have become an integral part of our society and our people are being threatened to a large extent. Instability and anarchy, which has completely dominated our administrative system.

What is the case is, no doubt, because of our politicians as everyone can experience that they have made politics a mockery. They, in the true sense of politics, are answerable to both the system and the people, but that is not the case in our society.

Politicians are to serve the people, facilitate the people with their non- diplomatic activities. Though they have numbers of problems, to solve the issues and fulfill their responsibilities as much as possible. Unfortunately in our case, the politicians shield the people, preserve their own benefits, mislead the nation, never work for political order, and their actions do not have any sort of similarity with the human welfare and betterment. They try to maintain their own benefits, mislead the nation, never work for political order, and their actions do not have any sort of similarity with the human welfare and betterment.

Albeit it is important to note that a little political consciousness can make us understand the problems that are being played by our politicians. On various occasions, an image of an ideal society and on other they smack us with the unkind reality to return to the practical world. In such a scenario we neither understand the reality nor the falsehood. It must be kept in consideration that the reaction and attitude of the people have to be considered liable as well for the prevarication and political games.

If the politicians are not able to govern appropriately, they are also not able to judge the political games, which are being presented to the people. It is really essential for them to remain vigilant and voice against such attitude of the politicians.
