ADB

KABUL - Team of experts is to investigate solar energy solutions to generate electricity in the country.

Maulvi Qarnainuddin Khalil, Chief of the Afghan Open Advisory Fund (OAF), said "Our mission is to assess the potential of renewable energy in Afghanistan and work towards developing sustainable energy solutions for the country." He added that the focus would be on solar energy initially.

Meanwhile, the Afghan government has announced plans to construct a 500 MW solar power plant in the coming years. The project is expected to be completed in 2022.

Coordination with partners

ADB is also coordinating with international partners to support the implementation of renewable energy projects in Afghanistan. The bank is working closely with the International Renewable Energy Agency (IRENA) and the European Union.

The announcement comes at a time when Afghanistan is facing a significant energy crisis, with the country relying heavily on imported fossil fuels.
