**Indian Military Downs Double on PM Modi’s ‘Radar Evading Cloud Theory’**

New Delhi: With several top Indian military officials defending Narendra Modi's ‘radar evading cloud’ theory, many in the military have asked how long the prime minister’s vision for Indian armed forces would last. The Prime Minister’s Office (PMO) has been working on developing radar evading clouds to protect India’s military assets from enemy radar detection. The Indian Army has conducted several experiments with cloud formations to test their effectiveness against radar detection systems. The Indian Navy has also been working on developing a ‘cloud barrier’ system to protect its ships from enemy radar detection. The Indian Air Force has been testing cloud formations to protect its aircraft from enemy radar detection. **Satellite Images Show Crop Fires in Brazil’s Rebel Enclave**

A satellite image has shown crop fires in Brazil’s rebel enclave in the Amazon rainforest. The fires, which are mostly due to deforestation for agricultural purposes, have been burning for several weeks. The Brazilian government has been under pressure to take action to stop the fires, which are contributing to the country’s climate crisis. **As Shanahan Heads to Asia, Iran Tensions Threaten Pentagon’s ‘Great Power Focus’**

Washington - Acting U.S. Secretary of Defense Mark Esper said Sunday that the recent military build-up in the Persian Gulf region is a response to threats posed by Iran. The buildup is intended to deter Iran from taking any further steps to increase its nuclear capabilities or to launch any further attacks against US forces.
