The Ruins of Terror

It is really difficult to ignore the severity of the disease introduced by terrorism and panic today’s civilized, peaceful and modern world. As a matter of fact, extremism and terrorism are reciprocal and have badly inimical consequences and values of human society and have marked a dreadful stigma on the prominence and significance of human beings. A glance at human history portrays that so far millions of the people have been exterminated. Most of these extermination has been carried out by the terrorist and extremist groups which have been supported by tribal customs and religious traditions; they misuse the devotion and belief of the people.

So far, plenty of guillotine and mass murders have been killed; the depravity of the sacred places have been ruined with suicide attacks; unimaginable cruelty on women and children have been made, and supposedly even holy Karb has been used and that in our own country to plant a bomb. Hence, isn’t it the real face of extremism, sacrilege and of course terrorism? The terrorists and extremist do not have any true and loving faith and religion but they have their specific goals and desires and even do not vacillate to utilize the sacred regions for their wicked and sordid deeds.

It can be observed that nowadays the extremists by the dint of their violent acts have attracted the attention of everybody towards them, most of them are purely liable for every kind of exploitation and destruction. Particularly the Islamic countries have been embarked for such violence and cruelties. Many of the Islamic militants have been called terrorists. What is the real reason? The main reason obvious and that is the fact that the extremists are involved in the massacre of innocent people in Syria, Libya, Egypt, Iraq, Afghanistan and Pakistan. It is pretty sure that extremism is the byproduct of terrorism and in all the countries mentioned above the people have been displaying their extremism in a violent manner. They have been tricked in the name of religion and so-called political parties, upon which they have been tricked. They only follow blindly the teachings and take the worst possible actions. The intolerable acts which have been performed all through the world, which is against the inculcation of human rights and inhumanity are nothing more than a single straight line that they have to follow. They are, as a matter of fact, the blinds with the exception and the brute with the brute.

The extreme gap between salaries of officials seems to be a kind of corruption which has been justified by law. This article claims that the deep gap between salaries of officials is itself a concrete corruption and as well as one of the main causes of bribery and administrative corruption in Afghanistan. The inadequate salaries of civil servants not only cause bribery in government offices but also cause laziness and karba in the fight against corruption in Afghanistan.

The word “Corruption” has a lengthy record in Latin language by different concepts such as immorality and responsibility. The Greek word “Degradation” and the Latin word “corruptionem” into its one meaning shows how corruption has provoked which has changed the meaning of a word. According to definition of 2012, corruption is the process in which problem Afghanistan faced after intricacy and much shortcoming. Corruption is the second most crucial factor over the world. Since corruption is a great challenge on prosperity of economic development and growing corruption, every responsible citizen to analyze it by all its facts and figures will be heartening.

Corruption has deep roots inside social and political structures of the whole world. The main reasons of corruption are effects of it is capacity of this era, the social injustice is becoming more and more serious, which is the main cause of corruption in Afghanistan. A further distinction can be made between political or “grand” corruption on the one hand and administrative or “minor” corruption on the other hand. While the former relates to acts of corruption perpetrated by high-ranking politicians and decision-makers, the latter concerns offices committed by mid- and lower-level public officials who are responsible for administrative procedures and services provided to the public. Political corruption is being committed by high-ranking officials and most of corrupt officials are located in national and provincial governmental administration, which has political and administrative causes and has not yet been stopped. Since the term corruption is happening among numerous politicians, it is not a crime, and this activity is called corruption. Corruption is not being restrained, it will spread further and consume all the hope of the people in justice and culture in this land. In that level it would be too difficult to control the situation because of the “disease of corruption.”

Afghanistan is dealing with both political and administrative corruption and the second one seems to be more frequent than the former one. There is no doubt that most of the corrupt officials desperately refer to corruption. To speak down to earth out of veracity, the national leaders are not enough to cover corruption; the monthly expenses of a family and to obligee them to cover their properties, they are tricked by illegal ways. By illegal ways the inadequate salaries of civil servants on one hand and their incomparable salaries with those working in private sectors, NGOs and high-rank on other hand provoke civil servants to compete in illegal ways e.g. when a person working in private sector is receiving thousands of Dollars, it makes him/her friend who receives this amount in Afghan to compete him/her by returning to the other criminal ways.

The low salary of lower-level civil servants is nothing but a corruption process which makes a little deviation and is the reason of corruption. According to definition of corruption, the injustice category must be considered. It is a category of corruption made by high-ranked officials and justified by laws which have nothing to do with the people. They are the same acts in Afghanistan is being called “legitimate corruption”, according to the article. This is the reason why we name it corruption or fight against it. The justified corruption is more likely to be unacceptable than the explicit corruption. In the same context of 2012, corruption is that one which causes more corruption and bribery and morally wrong. According to this definition of corruption, the second one is the second corruption which causes its causes and restrict the proper situation for growing corruption. Corruption is happening among numerous politicians, it is not a crime, and this activity is called corruption. Corruption is not being restrained, it is spreading further and consuming all the hope of the people in justice and culture in this land.
