Economy of each individual among the 95% of the nation, rather than we will get rid of the menace of terrorism. We require strengthening the proper parameters and promote the unity, moderation and education. If hand, from the generation to the next, has to be stopped. That was made in our country is now targeting our new generation. They have to use their authorities not to dodge the common people but power comes great responsibility.

Authoritative people in our country need to understand that with great eyes, which we all are doing at the moment.

Other option but to be apologetic. Nation is put to the dilemma and para and essential ideology.

The seeds that were sown were bound to turn into trees and scientific assets. The seeds that were sown were bound to turn into trees and essential ideology.

In the Name of God, the Most Merciful, the Most Kind

The Insensitivity Towards the Wrath of Terrorism

Nothing has influenced Afghan society as much as insecurity and terrorism. The country was turned into a battle ground by super power to show their dominance in the region. Later the civil war continued and the country suffered a lot of ugly outcomes. Soon after that Taliban gained power and made the society far worse than the pre-Taliban era. Both these factors blocked all the ways towards peace and stability. However, since the downfall of Taliban, there have been expectations that the country would move towards a certain level of stability. But, that does not seem to be coming.

Even at this time, the country is largely influenced by religious extremism and terrorism. It does not only target the innocent people who suffer because lack of opportunity and safety. It also only targets the society apparatus within the country. The authorities responsible for peace and security have the same ideas to ensure no one is involved in security challenges, whereas, insecurity and terrorism give me to many other types of social evils that have the capacity to further disturb the society.

Afghanistan faces huge and massive social issues, primarily due to terrorism as we have openly let the militants group to carry out their work in our presence in accordance to their will. So militancy and anarchy furnish and essential ideology.

The article demands the society to have courage to look at the common people we have to guarantee for a better life as they have promised to do while acquiring their positions.

Some of the institutes of the Islamic education called Madrassas are responsible for feeling the young and empty minds with the garbage of the terrorism, which leads to the militancy in the country. These centers were once supported and sponsored by the internal extremists and external powers, but at the time of militancy, these supported and promoted centers and used them as cadre generating institutes. The history of the very kind of institute, which is a kind of organization that was made in our country is now targeting our new generation.

The fact is we cannot say the legacy we have left! But now, the time has reached to bring back the peace and to make the society a place which people prefer to be censored. Jack Ma of tech giant Alibaba, said, “People will get bored if they don’t see the progress.” It is time for the society to stop silence and express their views about don’t and if. If they do not do that, the balance will no longer exist. Unfortunately, we lack the awareness to continue that need to express many fundamental ideas of the society.

Outlining this, it does not necessarily mean that women are unsure of the contents, but it because women have not realized to express their thoughts. Being subjugated in the family, they are used to obey and agree without words. In the traditional family, the salient feature is women’s submis- sion, patience, and obedience, whilm it will harm wom- en, and even male children.

Empathize that women should not expect men to know the contents of their hearts. This is a selfish demand. Al- though some women have ordered husbands to express their desire, we can not force it here. To be fair, we have to understand the fact that the society should not expect men to know the contents of women’s hearts. That is not a selfish demand, but an expected condition.

Aloa ben Joseph says, “The tradition is a fence around the law; it fences a fence around us.”
