More than 60,000 Yemeni Children May Have Died from Hunger: Humanitarian Body

**Dubai/AJEN**—An estimated 80,000 children under five may have died from extreme hunger in Yemen, a UN-backed humanitarian body said in an interim report in 2019. A humanitarian body said it was monitoring a situation, with a special appeal envoy arrived in Yemen to press for peace talks.

Western countries are press- ing the warring parties to make peace efforts to end the disas- trous conflict. The report described the world’s most ur- gent humanitarian crises, with 8.4 million people believed to be on the verge of starvation. Some of the numbers do not cor- rectly estimate the data, according to an estimate based on United States data, approximately 44,700 children suffering from severe acute malnutrition may have died in Yemen as of April 2019 and
