The Manifest for Development of Information Technologies and Communications has prepared Cambodia for its digital economy and has included some legislative acts of the Republic of Cambodia. The project which is to protect telecommunication networks from illegal (unauthorized) access to information.”

This bill regulates illegal connection, that is, the connection in circumvention of the rule. For example, if your neighbor connects to your Wi-Fi, cracking the password, and then using the internet, this will bear administrative responsibility. In addition, it is proposed to criminalize certain perilous intentional illegal connection to the transmission of important traffic.

The participants of the discussion are mistaken if they think that the use of VPN, various proxy servers, messengers or social networks, since the introduced changes and amendments do not consider the issues of restricting access to information and technical resources, as well as the use for this end of VPN networks, VPN tunnels, proxy servers for personal or business purposes or for business,” said the ministry.

“New use of VPN technologies, various proxy servers, messengers, social networks in general, both in the case of hacking, unauthorized access and illegal use of telecommunications networks are looked into,” the ministry stated. (Trend)

Boris Johnson turns up heat on May at Conservative conference...

The government is likely to be higher. “As we execute victories on the ground. (AFP) According to the government, the connection in circumvention of the rule. For example, if your neighbor connects to your Wi-Fi, cracking the password, and then using the internet, this will bear administrative responsibility. In addition, it is proposed to criminalize certain perilous intentional illegal connection to the transmission of important traffic.

The participants of the discussion are mistaken if they think that the use of VPN, various proxy servers, messengers or social networks, since the introduced changes and amendments do not consider the issues of restricting access to information and technical resources, as well as the use for this end of VPN networks, VPN tunnels, proxy servers for personal or business purposes or for business,” said the ministry.

“I don’t see the point,” he added, drawing huge applause from party members with a call to “chuck Chequers.” (AP)
