Aghan Taliban; An Unreliable Terrorist Group

Aghanistan is one of the terrorist groups operating in different parts of Afghanistan. This group has been killed its talks with Taliban and has resumed its talks with Afghanistan government in the peace process, while Taliban has denied that and has severed its relations with the US in the favor of previous draft agreement with the United States. However, Afghan people and the international community see no change in the behavior of the Taliban. They destroy the public infrastructures, terror cells’ schools, kill civilians, kidnap and kill passengers on the roads based on their ethnicity. This group, which has been killing Afghans indiscriminately as ISIS in different parts of Afghanistan, has been the most dominant that has supported Taliban for many years, how other countries see no change in the behavior of the Taliban. They want to miss the opportunity to be recognized as a legitimate political group by the international community. Peace Impossible without an Afghanistan ownership and Afghan led approach

The root causes of war in Afghanistan are discrimination, marginalization of people based on their ethnicity, religion, language and gender. As a result, the war in Afghanistan has internal roots that have been fueled by the external influence as well as the political system of the country and beyond. Thus, the main causes of conflict lie in Afghan society and its social structure. Currently, Afghans lack a sustainable peace in the country, it shall deeply investigate how to address the roots of the conflict and beyond. The Taliban, as any other Afghan government, shall lead this process. If Afghan peace process is not led by Afghanistan, government would be voided by the other stakeholders to gain the maximum benefit from it by manipulating the Afghan government as the elected representative of the Afghan people in the national interest such as the eradication of terrorism. However, most of the people consider it against their traditional and religious teachings. Entrepreneurs must go through strict and narrow-minded tribal norms and religious teachings.

The most dominant reason behind the rapid population growth in Afghanistan is that the people are not cognizant of the issue at all. Most of them consider it against their traditional, religious beliefs and never ever think that they can turn into crises if not nourished properly and there are no mechanisms of the state because of poor infrastructure and, thus, they are unable to provide them responsible members of the society. Ill-fated, most of the people in the country do not know that many of the problems that prevail in their personal lives and in the country are linked to unchecked population growth. Especially, the people belonging to the remote areas of the country do not understand what their basic right and responsibilities are in that respect. They are ill-informed about them. Furthermore, the rise in health facilities has been able to control the mortality rate to a certain extent, while the fertility rate is still on the rise.

Population growth rate in our country has been unchecked and can reach 3.5 percent in 2020 and 3 percent in 2021. This rate indicates the serious nature of the growth taking place in the country. Definitely, this growth rate is going to test the capabilities of the Afghan resources and Afghan government in the times to come.
